CERTIFICATE OF APPROVAL
No CF 5593

This is to certify that, in accordance with
TS00 General Requirements for Certification of Fire Protection Products
The undermentioned products of

MULTIFIRE INTERNATIONAL BV

PO Box 87116, 1080 JC Amsterdam, The Netherlands
Tel: +31 (0)20 3459020

Have been assessed against the requirements of the Technical Schedule(s) denoted below and are approved for use subject to the conditions appended hereto:

CERTIFIED PRODUCT	TECHNICAL SCHEDULE
Multifire FSC 2120 WB	**TS15 Intumescent Coatings for Steelwork**

Signed and sealed for and on behalf of Exova (UK) Limited trading as Warrington Certification

Paul Duggan
Certification Manager

Issued: 18th October 2017
Valid to: 6th September 2020

CERTIFICATE No CF 5593
MULTIFIRE INTERNATIONAL BV

Multifire FSC 2120 WB

1. This approval relates to the use of Multifire FSC 2120 WB for the fire protection of steel I-shaped beams and columns, circular and rectangular hollow column sections. The precise scope is given in Tables 1 to 24 which show the total dry film thickness of Multifire FSC 2120 WB (excluding primer and topcoat) required to provide fire resistance periods in accordance with BS476: Part 21: 1987 of 15 minutes up to 120 minutes for differing sections, section factors and design temperatures.

2. This certification is designed to demonstrate compliance of the product or system specifically with Approved Document B (England and Wales), Section 2 of the Technical Standards (Scotland), Technical Booklet E (N. Ireland). If compliance is required to other regulatory or guidance documents there may be additional considerations or conflict to be taken into account.'

3. The products are approved on the basis of:

   i) Initial type testing.
   ii) A design appraisal against TS15.
   iii) Certification of quality management system to ISO 9001: 2008.
   iv) Inspection and surveillance of factory production control.
   v) Audit testing.

4. The data referring to three-sided fire exposure of beams relate to beams supporting concrete floor slabs. Separate consideration is required where this is not the case.

5. The data shown is applicable to steel sections blast cleaned to ISO 8501-1 SA $2^1/_2$ or equivalent and primed with a suitable and compatible primer. Specifications of surface preparations, primers and topcoats are available from the manufacturer whose responsibility is to ensure that Multifire FSC 2120 WB is compatible for use in respect of both ambient and fire conditions. The total dry film thickness of primer and topcoat together should not exceed that tested.

6. Specific data given in the tables applies to horizontal, vertical, flexural and compression members supporting loads up to the maximum design loads specified in BS449: Part 2.

7. The approval relates to on going production. Product and/or its immediate packaging is identified with the manufacturers' name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.

8. The data shown in the tables is based on assessments which comply with the criteria for acceptability now incorporated within the CERTIFIRE scheme.

Issued: 18th October 2017
Valid to: 6th September 2020
