

CERTIFICATE OF APPROVAL No CF 5767

This is to certify that, in accordance with TS00 General Requirements for Certification of Fire Protection Products
The undermentioned products of

TREMCO CPG UK LIMITED

Coupland Road, Hindley Green, Wigan WN2 4HT TEL: 01942 251300

Have been assessed against the requirements of the Technical Schedule(s) denoted below and are approved for use subject to the conditions appended hereto:

CERTIFIED PRODUCT
Nullifire SC601 and Nulifire SC602

TECHNICAL SCHEDULE
TS15 INTUMESCENT
COATINGS FOR STEELWORK

Signed and sealed for and on behalf of Warringtonfire Testing and Certification Limited

Paul Duggan

Certification Manager

Issued: Revised: Valid to: 09th September 2019 19th August 2020 08th September 2024

Nullifire SC601 and Nulifire SC602

- 1. This certification is provided to the client for their own purposes and we cannot opine on whether it will be accepted by Building Control authorities or any other third parties for any purpose.
- 2. This approval relates to the use of Nullifire SC601 and Nulifire SC602 for the fire protection of steel I/H beams and columns, rectangular/square hollow beams, rectangular/square and circular hollow columns. The precise scope is given in Tables 1 to 26 which show the total dry film thickness of Nullifire SC601 and Nulifire SC602 (excluding primer and top sealer) required to provide fire resistance periods in accordance with BS476: Parts 20 and 21: 1987 of up to 90 minutes for I/H beams and columns, and hollow columns, and up to 120 minutes for rectangular/square hollow section beams for design temperatures in the range 350° C to 750° C.
- 3. The products are approved on the basis of:
 - i) Initial type testing
 - ii) A design appraisal against TS15
 - iii) Certification of quality management system to ISO 9001
 - iv) Inspection and surveillance of factory production control
- 4. The data referring to three-sided fire exposure of beams relate to I/H and rectangular/square hollow beams supporting concrete floor slabs. Separate consideration is required where this is not the case.
- 5. The data shown is applicable to steel sections blast cleaned to ISO 8501-1 Sa2.5 or equivalent and primed with a suitable and compatible primer. Specifications of surface preparations, primers and top sealers are available from TREMCO ILLBRUCK whose responsibility is to ensure that Nullifire SC601 and Nulifire SC602 are compatible for use in respect of both ambient and fire conditions. The nominal dry film thickness of primer and top sealer should be applied at a nominal thickness tested.
- 6. The data shown is applicable to Nullifire SC601 and Nulifire SC602 applied by spray to horizontal, vertical, flexural and compression members supporting loads up to the maximum design loads specified in BS449: Part 2.
- 7. The approval relates to on-going production. Product and/or its immediate packaging is identified with the manufacturers' name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.
- 8. The data shown in the tables is based on assessments which comply with the criteria for acceptability now incorporated within the CERTIFIRE scheme.
